

INfluenza Vaccine to Effectively Stop cardio Thoracic Events and Decompensated heart failure

## Do you have heart disease?

If you are over 18 years old AND have either:

Heart failure (in the past 2 years)

OR

A heart attack (in the past year)

## You may qualify for a research study. WHAT HAPPENS IN THIS STUDY?

• Vaccination with either high dose (investigational for adults

under the age of 65) OR standard dose flu shot, provided at no

## cost to you (once per year, up to 3 years)

- Monitoring for any heart or lung related hospital visits
- Telephone follow-up (*three times per year, up to 3 years*) \*Patients who have already received their flu shot this year are not eligible to enroll\*

For more information about how you can participate in INVESTED, please call: [Research Coordinator at (850) 576-4073 ext. 218, 298]

or visit: www.investedtrial.org

This study is funded by the National Institutes of Health. Brigham and Women's Hospital and the University of WisconsinMadison serve as the Clinical Coordinating Centers. The study has received approval of an Institutional Review Board (IRB).
